Founded by Basil Lyayuka
Proposal Created 06 Aug 2024

Let's refresh,

Why do I need a website for my business?

Even small local businesses that only serve their hometown need a site. That's because the web is the first place people go when looking for a product or service.

A website helps every business:

- Promote and sell their products and services
- Connect with new customers (and keep existing customers)
- Build credibility
- Compete with bigger businesses
- Control their brand and keep their marketing fresh and current

Citation: <https://www.godaddy.com>

Best of all, a website is much easier and more affordable than you might think. Idodoe offers a complete selection of online tools for building websites, along with hosting, email and marketing options to grow their business on the web.
